Date  
Re. Transport of Human cells for transfusion.

The bearer of this letter,

Is carrying Human cells for transplantation. The cooler containing the human cells must be kept in close possession of the courier in the passenger compartment of the aircraft. This product is urgently needed for transfusion of a patient with a severe blood disease. The safe and prompt delivery is a matter of life and death.

This product is not dangerous and non infectious and screened under laboratory conditions. It is taken from a healthy donor who has been tested negative for infectious diseases (including hepatitis, hiv and others). It is human material containing no animal material and not of tissue culture origin. It is obtained directly from humans not recombinant, not cultured. It is not for retail or resale.

Blood or tissue intended for transfusion or transplantation is exempt from IATA and UN packing instruction regulations.

Comprehensive information on the nature of this product is provided in the circular of information that is in possession of the courier.

Thank you for your cooperation.

Sincerely

Dr. M.R. de Groot MD, PhD
